

MAHDI EQBAL

Business Systems | Revenue / GTM Systems | CRM Automation & Integrations

Tehran, Iran | Open to Remote Work & International Relocation | +98 913 670 0243 | m.mahdi.eqbal@gmail.com

[LinkedIn](#) | [Portfolio](#) | [GitHub](#)

PROFILE

Systems-oriented professional building practical capability at the intersection of business processes, CRM, automation, integrations, and operational data. Hands-on work includes end-to-end implementations with HubSpot, Salesforce, n8n, PostgreSQL/Supabase, REST APIs, webhooks, JavaScript, SQL, Clay, and Make. Strong focus on translating business logic into reliable workflows, improving data quality, handling exceptions and failures, documenting system behavior, and creating auditable operational processes. Seeking an opportunity to move from independent implementations into real commercial delivery within a professional team.

TARGET ROLES

Business Systems / Systems Analyst | Revenue Operations / GTM Systems | CRM Operations / CRM Automation | Sales Operations | Business Process / Automation | Junior / Associate Business Analyst

CORE CAPABILITIES

CRM & Revenue Systems: HubSpot, Salesforce, CRM architecture, lifecycle design, qualification, routing, ownership, sales handoff, SLA logic

Automation & Integration: n8n, Make, REST APIs, webhooks, JSON, authentication, JavaScript, scheduled and event-driven workflows

Data & Systems: SQL, PostgreSQL, Supabase, relational data, data modeling, operational state, identity resolution, deduplication, validation

Reliability & Operations: idempotency, duplicate controls, retries, failure handling, troubleshooting, testing, auditability, documentation

GTM & AI Workflows: Clay, Claygent, enrichment, structured research, deterministic scoring, confidence/uncertainty handling, human review

SELECTED INDEPENDENT IMPLEMENTATIONS

Product-Led Revenue Qualification & Sales Handoff System

HubSpot | n8n | PostgreSQL/Supabase | REST APIs | Webhooks | JavaScript | [Repository](#)

- Built an authenticated product-event-to-CRM system with contact/company identity resolution, CRM context loading, deterministic qualification, active-deal and handoff guards, duplicate-event detection, failure/retry paths, and auditable processing state.

Lead-to-Opportunity Revenue Operations System

Salesforce | Salesforce Flow | n8n | PostgreSQL/Supabase | REST APIs | JavaScript | [Repository](#)

- Built a lead lifecycle system covering validation, deduplication, data readiness, ICP/buying-intent qualification, routing, SLA control, Salesforce synchronization, opportunity handoff, and explicit exception handling.

AI-Assisted GTM Intelligence & Account Prioritization System

Clay | Claygent | n8n | PostgreSQL/Supabase | Deterministic Scoring | Human Review | [Repository](#)

- Built a structured account-intelligence workflow combining enrichment, hiring/company signals, AI-assisted research, deterministic scoring, confidence controls, uncertainty handling, and human-review routing.

ADDITIONAL EXPERIENCE

Self-Employed Business Owner | Tehran, Iran | 2009-Present

- Owned and operated two local businesses, managing day-to-day operations, customer-facing sales and service, vendor coordination, business administration, and practical process improvement.

EDUCATION & LANGUAGES

M.Sc. Civil Engineering

B.Sc. Industrial Engineering - Payame Noor University, Yazd, 2024

Languages: Persian - Native | English - Upper-Intermediate | Arabic - Intermediate

Mobility: Available for remote work; prepared for rapid relocation to neighboring countries and open to broader international relocation where work authorization or sponsorship is feasible.

Portfolio projects are independently designed and built professional implementations using synthetic/public-safe data. They are not presented as client deployments, employer projects, or claimed commercial results.
